DESCRIPTION
The center airbag sensor assembly consists of parts such as the airbag sensor, the safing sensor, the drive circuit, the diagnostic circuit and the ignition control.
When the center airbag sensor assembly receives signals from the airbag sensor, it determines whether or not the SRS should be activated.
B1000/31 is set when a malfunction is detected in the center airbag sensor assembly.

<table>
<thead>

</tr>
</thead>
<tbody>
<tr>
<td>B1000/31</td>
<td>Center airbag sensor assembly malfunction</td>
<td>Center airbag sensor assembly</td>
</tr>
</tbody>
</table>

HINT:
When any other DTCs are set simultaneously with B1000/31, repair the malfunctions indicated by those DTCs first.

1 CHECK CENTER AIRBAG SENSOR ASSEMBLY

(a) Turn the ignition switch to the LOCK position.
(b) Disconnect the negative (-) terminal cable from the battery, and wait for at least 90 seconds.
(c) Connect the negative (-) terminal cable to the battery, and wait for at least 2 seconds.
(d) Turn the ignition switch to the ON position, and wait for at least 60 seconds.
(e) Clear any DTCs stored in the memory (See page RS-34).
(f) Turn the ignition switch to the LOCK position.
(g) Turn the ignition switch to the ON position, and wait for at least 60 seconds.
(h) Check for DTCs (See page RS-34).

OK: 
DTC B1000/31 is not output.

NG REPLACE CENTER AIRBAG SENSOR ASSEMBLY

USE SIMULATION METHOD TO CHECK
DESCRIPTION

The front airbag sensor RH consists of parts such as the diagnostic circuit and the frontal detection sensor.

The configuration of the front airbag sensor LH is the same as that of the RH. When the center airbag sensor assembly receives signals from the frontal deceleration sensor, it determines whether or not the SRS should be activated.

DTC B1610/13 is set when a malfunction is detected in the front airbag sensor RH circuit.

DTC B1615/14 is set when a malfunction is detected in the front airbag sensor LH circuit.

A12  
Front Airbag Sensor RH

Center Airbag Sensor Assembly
CAUTION:
In order to prevent unexpected airbag deployment, disconnect the following connectors before inspecting parts such as wire harnesses, if the application of tester probes to the center airbag sensor assembly connector is necessary.
(a) Turn the ignition switch to the LOCK position.
(b) Disconnect the negative (-) terminal cable from the battery, and wait for at least 90 seconds.
(c) Disconnect the connectors from the center airbag sensor assembly.
(d) Disconnect the connectors from the steering pad.
(e) Disconnect the connector from the front passenger airbag assembly.
(f) Disconnect the connector from the front seat outer belt assembly LH.
(g) Disconnect the connector from the front seat outer belt assembly RH.
HINT:
Skip the following steps if side and curtain shield airbags are not fitted.
(h) Disconnect the connector from the front seat airbag assembly LH.
(i) Disconnect the connector from the front seat airbag assembly RH.
(j) Disconnect the connector from the curtain shield airbag assembly LH.
(k) Disconnect the connector from the curtain shield airbag assembly RH.

1 CHECK DTC

(a) Proceed to the appropriate step according to DTC readings.
(1) Check the DTC (See page RS-34).

D USE SIMULATION METHOD TO CHECK

2 CHECK CONNECTION OF CONNECTORS

(a) Turn the ignition switch to the LOCK position.
(b) Disconnect the negative (-) terminal cable from the battery, and wait for at least 90 seconds.
(c) Check that the connectors are properly connected to the center airbag sensor assembly and the airbag sensor front RH.

OK:
The connectors are properly connected.

NG CONNECT CONNECTORS
3 CHECK CONNECTOR

(a) Check that the connectors (on the center airbag sensor assembly side and airbag sensor front RH side) are not damaged (See page IN-34).
OK:
The connectors are not deformed or damaged.

NG REPAIR OR REPLACE WIRE HARNESS

OK

4 CHECK FRONT AIRBAG SENSOR RH CIRCUIT (FOR OPEN)

(a) Disconnect the connectors from the center airbag sensor assembly and the front airbag sensor RH.
(b) Using a service wire, connect A12-2 (+SR) and A12-1 (-SR) of connector E.
NOTICE:
Do not forcibly insert the service wires into the terminals of the connector when connecting.
(c) Measure the resistance.
Standard resistance

<table>
<thead>
<tr>
<th>Tester connection</th>
<th>Condition</th>
<th>Specified Condition</th>

Go to step 43

**OK**

Go to step 44
40 CHECK ENGINE ROOM MAIN WIRE (FOR OPEN)

(a) Disconnect the engine room main wire connector from the instrument panel wire.
HINT: The service wire has already been inserted into connector E.
(b) Measure the resistance.

**Standard resistance**

**NG** REPAIR OR REPLACE ENGINE ROOM MAIN WIRE

**OK**

REPAIR OR REPLACE INSTRUMENT PANEL WIRE
42 CHECK ENGINE ROOM MAIN WIRE (TO B+)

(a) Turn the ignition switch to the LOCK position.
(b) Disconnect the negative (-) terminal cable from the battery, and wait for at least 90 seconds.
(c) Disconnect the engine room main wire connector from the instrument panel wire.
(d) Connect the negative (-) terminal cable to the battery, and wait for at least 2 seconds.
(e) Turn the ignition switch to the ON position.
(f) Measure the voltage.

**Standard voltage**

**NG**

REPAIR OR REPLACE ENGINE ROOM MAIN WIRE

**OK**

**REPAIR OR REPLACE INSTRUMENT PANEL WIRE**

**44 REPAIR OR REPLACE INSTRUMENT PANEL WIRE**

(a) Turn the ignition switch to the LOCK position.
(b) Disconnect the negative (-) terminal cable from the battery, and wait for at least 90 seconds.
(c) Replace the center airbag sensor assembly (See page RS-602).

**HINT:**
Perform the inspection using parts from a normal vehicle when possible.
(d) Connect the connectors to the center airbag sensor assembly, front airbag sensor RH and front airbag sensor LH.
(e) Connect the negative (-) terminal cable to the battery, and wait for at least 2 seconds.
(f) Turn the ignition switch to the ON position, and wait for at least 60 seconds.
(g) Clear any DTCs stored in the memory (See page RS-34).
(h) Turn the ignition switch to the LOCK position.
(i) Turn the ignition switch to the ON position, and wait for at least 60 seconds.
(j) Check for DTCs (See page RS-34).
OK:
DTC B1610/13 and B1615/14 are not output.

HINT:
DTCs other than B1610/13 and B1615/14 may be output at this time, but they are not related to this check.

NG
REPLACE FRONT AIRBAG SENSOR RH AND LH

OK

END
